

Hello,

I am writing to comment on the benefit that the radio station Air1 provides to the community.

I no longer live in a community where Air1 is broadcast. However, I previously lived in such a community and found that I benefited greatly from Air1. Air1 provides encouragement and a positive message to communities through a music style that is normally full of destructive, hate-filled, messages. I believe that Air1 can and does have a impact on members of a community who are often overlooked.

If Air1 is displaced by LPFM stations in communities that are fortunate enough to have its broadcast, they will be losing an important and valuable community resource.

Thank you,
Lance
